Your Chart Is Not Your Fate — It Is Your Map

Vedic astrology doesn't predict what will happen. It shows where energy is concentrated, and where it is blocked. Once you can read your map, you can act with the current instead of against it.

1. Lagna (Ascendant) — Your Physical Reality

The sign rising on the eastern horizon at your birth moment. This sign's lord controls your body, health, and first impressions. **Weak lagna lord = health issues, slow start in life.**

2. Moon Sign (Rashi) — Your Mind and Emotional Pattern

Jyotish prioritises moon over sun. The moon governs your mental state, emotional responses, and inner motivations. **Afflicted moon = anxiety, self-doubt, inconsistency.**

3. Your Current Mahadasha — The Operating System

You are always running under one planet's mahadasha (major period, 6-20 years). Everything filters through that planet's energy. **If your mahadasha lord is weak, even good transits won't deliver.**

The 3 Health Houses to Watch

House 1: The body itself. **House 6:** Disease, enemies, service. **House 8:** Chronic illness, sudden events, longevity.

The 3 Wealth/Career Houses

House 2: Accumulated wealth, family. **House 10:** Career, reputation. **House 11:** Income flow, gains.
